**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 23-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gallo et al (U.S. Pat. # 5,113,554).

With regard to claims 23-28, Gallo et al discloses a one-piece flexible clip (figs. 1-2) comprising an upper portion (40) that is capable to be flex between a stable convex open position and a stable concave closed position, a lower portion (16) with a plurality of planar teeth (18, 20) extending parallel to the length of the upper portion, the lower portion being integrally connected to the upper portion (figs. 1-2), the lower portion being at least as long as the upper portion (see fig. 1) and the lower portion extending laterally beyond the periphery of the upper portion (figs. 1-2), the plurality of planar teeth in the lower portion inherently forming a comb configuration and a plurality of protuberances (30, fig. 1) formed on an interior side of the upper portion for enhancing the gripping properties. Gallo et al further shows the lower portion hingedly connected to the upper portion (at 32). Gallo et al fails to show the material of the upper and lower portions being made of spring steel material, however, it would have been obvious to one having an ordinary skill in the art at the time the invention was made to construct

the upper and lower portions with the spring steel material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416. Applicant is noted that the clip of Gallo et al is capable of functioning as claimed.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Scheemaeker is cited to show the state of the art with respect to a spring clip.
